The company Jola Spezialschalter GmbH & Co. KG

The company Jola Spezialschalter GmbH & Co. KG is a medium-sized enterprise based in the German town of Lambrecht employing about 70 people. It was founded in 1952 as a sister company of the former cloth factory “Gebrüder Haas” to develop and market a company invention, a water-tight limit switch and a level controller based on the same principle. Today Jola is a well-known manufacturer in the area of level control and leakage detection for all liquid applications.

Since we utilize serial and individual production processes, we offer both standard products and purpose-built items. Our strength is comprehensive technical advice combined with quick manufacturing and delivery times. The product range comprises solutions for automation technology, building-services engineering, and environmental protection.

Jola products can be purchased in many parts of the world. The French subsidiary JOLA SARL was founded in 1986 at Romainville near Paris. Authorized dealers market the Jola product range in many other European and several non-European countries.

Our quality policy

We are committed to providing a flexible and punctual service for our customers and aim by this means to win customer loyalty.

Our purpose is to increase the commercial success of our business through the quality of our organization, activities, products and services, thereby stabilizing our position in the market, protecting the environment, and securing jobs.

We aim to highest quality and safety when manufacturing equipment intended for use in potentially explosive atmospheres according to ATEX and IECEx.

These goals should be reached with the help of motivated employees. Our efforts are supported through comprehensive training programmes, co-operative teamwork and transparent organizational structures.
