

Information on SVHC According to Regulation (EC) No 1907/2006 ("REACH")

5 March 2024 | Page 1 of 1

Dear Sir or Madam,

From time to time, our customers ask us to comment on our compliance with certain topics.

Regulation (EC) No 1907/2006 of 18 December 2006 ("REACH Regulation") deals with the **Registration, Evaluation, Authorization and Restriction of Chemicals**. It regulates the use of substances on their own, in mixtures or in articles in the European Union. With REACH, the use of chemicals should be seamlessly traceable from manufacture to end use.

We are aware of the obligations under the REACH Regulation that apply to us and fulfill these obligations completely. As a manufacturer of measurement and control technology, we are a so-called "downstream user" and solely produce non-chemical products (products according to Art. 3 No. 3 of the REACH regulation).

We are a producer and supplier of articles according to the definitions in Art. 3 No 4 and No 33 of the REACH Regulation. We therefore have the duty to communicate information according to Art. 33 of the REACH Regulation if we pass on substances of very high concern (SVHC) mentioned in the Candidate List in accordance with Art. 59 of the REACH Regulation with the delivery. We shall provide sufficient information to allow safe use if these substances are contained in a concentration above 0.1% weight by weight (w/w) in a product, in a homogeneous product component, or in the packaging. If this is the case, we will inform you about it in the order confirmation.

This declaration is based exclusively on the information from our suppliers in accordance with Art. 31-33 of the REACH Regulation. For a small company like ours, material tests to determine SVHCs are neither technically nor economically feasible.

If you have any further questions, please do not hesitate to contact our [sales department](#):
