

Jola's Sustainability Policy

7 March 2022 | Page 1 of 1

Jola Spezialschalter GmbH & Co. KG is a renowned manufacturer of measurement and control technology, mainly for level control and leakage detection of fluids, with around 60 employees at its location in Lambrecht (Palatinate, Germany). In over half of a century it has built up a high-quality product range that includes solutions for industry, mechanical and plant engineering, building technology and many other sectors.

Jola has established and implemented a **sustainability management system** (SMS) that is maintained and continuously improved. The direction commits itself as well as Jola's employees to meet applicable requirements and to continually improve the SMS.

The sustainability policy supports our company's strategic direction. It is based on the principles of social responsibility described in ISO 26000:2010.

1. Accountability

Jola is accountable for the impact of its decisions and activities on society, the economy and the environment.

2. Transparency

Jola is transparent about its decisions and activities that affect society and the environment.

3. Ethical behaviour

Jola acts ethically.

4. Respect for stakeholder interests

Jola respects the interests of its stakeholders and takes them into account.

5. Respect for the rule of law

Jola recognizes that it is imperative to respect the law.

6. Respect for international norms of behaviour

Jola respects international standards of conduct while at the same time adhering to the rule of law.

7. Respect for human rights

Jola respects human rights and recognizes both their importance and their generality.
